

LED AREA LIGHTS - STERLING® (XSB)

US patents D676182, D675361, 7828456, 8002428, 7952293, 8432108 & 8567983 and CN patents 2693131 & 2701653 and US & Int'l. patents pending

SMARTTEC™ - LSI drivers feature integral sensor which reduces drive current, when ambient temperatures exceed rated temperature.

ENERGY SAVING CONTROL OPTIONS - DIM - 0-10 volt dimming enabled with controls by others. BLS - Bi-level switching responds to external line voltage signal from separate 120-277V controller or sensor (by others), with low light level decreased to 30% maximum drive current.

OCCUPANCY SENSING (IMS) - Optional integral passive infrared motion sensor activates switching of luminaire light levels. High level light is activated and increased to full bright upon detection of motion. Low light level (30% maximum drive current) is activated when target zone is absent of motion activity for ~2 minutes. Sensor is located on the center of the access cover and has a detection cone of approximately 45°.

EXPECTED LIFE - Minimum 60,000 hours to 100,000 hours depending upon the ambient temperature of the installation location. See LSI web site for specific guidance.

LEDS - Quantity of LEDs between 168 and 302 offered in Cool White (5000°K nominal) or Neutral White (4000°K nominal) color temperature. 70 CRI (nominal).

DISTRIBUTION/PERFORMANCE - Available in wide throw (Type 5 and Type FT) and extended wide throw (Type 5X, AIX, FTX, FTAX) distributions. FT-L, FT-R, FTX-L, FTX-R, FTAX-L and FTAX-R allow for D180° mounting configurations with factory set optics for front row automotive applications.

HOUSING - One-piece die-cast aluminum housing contains four gasketed die-cast aluminum optical assemblies. Self-cleaning, vertically oriented structural ribs cast into housing allow for maximum heat dissipation. All hardware is stainless steel.

OPTICAL UNITS - Patented and patent pending angled optical assemblies feature clear tempered optical-grade glass sealed to die-cast aluminum optic assembly to create super-tight IP67 protection (includes pressure stabilizing breather). Lens is mounted perpendicular to angled LEDs to produce widest distribution with highest efficacy possible.

MOUNTING - Use with 5" traditional drilling pattern. Die-cast aluminum mounting arm, with gasket supplied for use between pole and arm, mounts to round or square pole. Round pole plate not required. Standard fixture arm allows for 90° and 120° mounting configurations. Mounting arm wiring access panel (with safety lanyard) utilizes a tool-less thumbscrew fastener.

ELECTRICAL - Terminal block, in mounting arm, for attachment of incoming primary wiring is supplied. Two-stage surge protection (including separate surge protection built into electronic driver) meets Location Category C Low. Available with universal voltage power supply 120-277VAC (50/60Hz input) and 347-480VAC. Optional twistlock photocell receptacle is available. Photocell must be ordered separately.

DRIVERS - Available in SS (Super Saver), HO (High Output) and VHO (Very High Output) drive currents (Drive currents are factory programmed.). Components are fully encased in potting material for moisture resistance. Driver complies with IEC and FCC standards. Drivers can be easily accessed by removing tethered center access cover.

OPERATING TEMPERATURE - -40°C to +50°C (-40°F to +122°F).

FINISH - Fixtures are finished with LSI's DuraGrip® polyester powder coat finishing process. The DuraGrip finish withstands extreme weather changes without cracking or peeling.

WARRANTY - LSI LED fixtures carry a limited 5-year warranty.

PHOTOMETRICS - Application layouts are available upon request. Contact LSI Applications Group at lighting.apps@lsi-industries.com

SHIPPING WEIGHT (in carton) - 65 lbs./29.5Kg

LISTING - ETL listed to U.S. and International safety standards. Suitable for wet locations.

FOOTNOTES:

- 1 - IMS, DIM and BLS cannot be ordered together.
- 2 - Do not specify for satellite units.
- 3 - Available with wireless controls - contact factory. Not available with DIM or BLS
- 4 - Photocell must be ordered separately. See Accessories.
- 5 - House Side Shields add to fixture EPA. Consult factory.
- 6 - Factory installed PCR option required. See Options.
- 7 - Fusing must be located in the hand hole of pole.
- 8 - Includes VCM. To be used in conjunction with VCM option in fixture. Consult factory.
- 9 - To be used in conjunction with any of the VCM control modules and ES sensor option in fixture. Consult factory.
